Seyit Geldiyev

Middle+ Software Engineer
Ashgabat City, Turkmenistan

Summary

Experienced Software Developer with a demonstrated history of working in the tech industry. Skilled in Web development, React.js, Server Administration, Python (Programming Language), Node.js, and Docker.

Experience

KinesteX AI Personal Trainer in your Digital Health Platform

Software Developer
May 2025 - June 2026 (1 year 2 months)
Dubai, United Arab Emirates

Built a data-driven dashboard application with Next.js (App Router) and React, using Server Components for fast initial loads and reusable UI components for tables, cards, and charts.
Developed backend logic inside Next.js using API routes / Server Actions, shaping backend responses to exactly what the frontend needed and reducing unnecessary data transfer.
Set up CI/CD with Vercel, with automatic production deployments on push to main and preview deployments for every pull request, so features could be reviewed on a live URL before release.

Ynamly Belentlik

Frontend Developer
December 2022 - June 2026 (3 years 7 months)
Ashgabat, Turkmenistan

Worked closely with UX team to meet pixel-perfect UI with Tailwind CSS.
Implemented dark mode and accessibility features.
Built reusable Vue components and page layouts.
Integrated third-party APIs and developed responsive dashboards.
Improved Lighthouse performance score from 68 to 95+ website-wide.

ForEach Partners

Frontend Developer
December 2024 - March 2025 (4 months)

Translated Figma designs into clean Vue components.
Supported QA team with debugging and testing fixes.
Contributed to feature development and UI fixes.

Datacorda
Frontend Developer
June 2023 - October 2023 (5 months)
United States

Built and maintained Vue 3 components for a multi-tenant Nuxt 3 dashboard application.
Integrated AWS S3 for media upload and asset storage, with Amplify for CI/CD and hosting.
Collaborated with backend team deploying APIs on AWS EC2 and connecting them via Axios modules.
Managed custom domain setup and routing using GCP Cloud DNS.
Created dev/prod environments with seamless deployment flows, improving delivery speed by 30%.

Belli Creative
Frontend Developer
June 2020 - November 2022 (2 years 6 months)
Ashgabat, Turkmenistan

Built a dynamic CV maker using Nuxt 3 with live form-driven data rendering and PDF export support.
Created a badge generator app allowing users to design and download SVG/PNG name badges.
Developed customizable, CMS-free dynamic landing page templates for startups using Vue + Tailwind.
Designed modular Vue 3 components and incorporated Nuxt 3 with SSR as well as SEO in mind.
Refactored legacy Vue 2 applications to Vue 3 based on Composition API and Pinia.
Managed the performance optimization project, reducing TTI by 40%.

Education

Institute of Telecommunications and Informatics of Turkmenistan
Engineer's degree, Information Security Engineering · (September 2021 - June 2026)
